

The Assistant Manager™

ECOMMERCE

The Tech Required

An ecommerce application that has the tech you and your online customers require built in and continues to evolve.

PCI Secure

Fully PCI-DSS compliant and tokenized, never storing credit card data so you can't be hacked!

Responsive

Websites aren't just viewed on computers. Visitors use smartphones and tablets as well, so we make sure the application is responsive to all devices.

Instinctive

Easy to navigate and quick to complete transactions. Visitors will shop more efficiently and thereby make bigger purchases.

Built to Converge Commerce

An ecommerce application that seamlessly interfaces your Web presence with all other business units.

Clicks are Bricks

Truly converge commerce. All Web sales are centralized in one data store. No duplication of records or efforts!

Cross Sell

Publish any product or service. Your customer will browse products, memberships, make donations, and reserve tickets all in one single transaction.

Integrated

A sale is made on the site and instantly synchronizes to fulfillment. Revenues are recorded, inventories and event capacities are adjusted, and benefits are activated.

No Coding Approach

Construct and oversee an ecommerce website without coding or IT assistance. Make changes faster and easier while reducing programming costs.

Why Wait

Tired of waiting on the developers, designers, or IT to keep your site relevant? Stop waiting and easily update the site on your schedule.

Branded

Match your web presence to the organization's existing branding. Insert unique headers, footers, banners, and ads.

Bricks Make Clicks

Add navigation categories, products, and services with the click of a button. Save effort and time by maintaining the entire site's offerings in one place.

Low Ownership Costs

An ecommerce application that is very affordable and scalable to your organization's exact needs and budget. Once purchased, the on-going costs will be easy to live with.

No Fees

We never charge your organization any transaction fee or commission.

Reduced Costs

Affordable hosting, annual new version subscription, and a single provider keeps costs of site ownership down.

No Restrictions

Save on credit card fees by choosing your own processor. We do not force utilization of a single credit card processor or bank.
