

The Assistant Manager™

INTEGRATED PAYMENT PROCESSING

Full and Seamless Integration

Fully integrate card payments with all facets of the solution while accurately recording detailed authorization information.

Fast Authorization

Card payment authorization in three seconds or less (in most configurations).

Detailed Audit Trail

The application records detailed payment data including card tendered, payment amount, token, and authorization data.

Converged Commerce

At customer facing merchandise, admissions, or dining registers, phone centers, administration offices, and on the Web, payment processing is converged with detailed and accurate reporting.

No Processor Limitations

Why choose an application that limits your organization's card payment processor? Low initial fees, when arbitrarily increased later, can leave you without options.

Multiple Options

TAM offers more than one middleware or gateway for you to choose from.

Pick a Processor

Pick the processor that fits your organization's needs with our middleware or gateway options.

Shop and Compare

Now or in the future, keep your organization's existing processor or shop and compare others for the best rates and services.

Certified PCI Compliant

Our application meets or exceeds all Payment Card Industry processing requirements.

Full P2PE

EMV option provides full point-to-point encryption security.

PCI Secure

Certified fully PCI-DSS compliant by the PCI Security Standards Council.

Tokenized

Never storing sensitive payment card data dramatically reduces organizational PCI certification requirements.

Supports All Payment Types

Our application supports the many major forms of credit card payment.

Chip and Swipe

Supports all major credit card input forms including chip, swipe, or manually entered.

Tap and Pay

Supports Apple and Android near field communication payment processing.

Debit

Supports EBT/Debit cards with PIN validation.

The Assistant Manager™

INTEGRATED PAYMENT PROCESSING

Gift Card Integration Adapter

Optionally, integrate capabilities to sell, check balances, accept as payment, and reload gift cards at any TAM POS station.

All Channel Support

Offer and redeem credit cards throughout your organization and on the Web. Low cost branded cards for any occasion.

Global and Product Specific Use

Produce gift cards in two ways: global gift cards for any use throughout the organization that can be sold, reloaded, and redeemed; or produce on demand single use cards.

Accurate Balance Tracking

Instantly track and update the balance of any card and its use restrictions throughout any channel.
